<td>I am very happy with the Broughton plan, and its efforts to protect the future of the village, and fully support the villagers who have worked so hard on this.</td>
</tr>
<tr>
<td>Rep 2</td>
<td>I very much welcome the neighbourhood plan, and I would urge Kettering borough council, to speed up this process, without any undue delay, so that Broughton community can move to a more democratic self-determination, which will be given added impetus when we move to a unitary authority.</td>
</tr>
<tr>
<td>Rep 3</td>
<td>I am writing with regards to the above plan which has been formulated entirely through consultation with the residents of Broughton Village. I would like to wholeheartedly support the plan and its contents particularly with regards to future housing planning proposals for the village. The housing survey has clearly identified the future housing needs for the village and how those needs should be addressed. I believe wholeheartedly that the proposal and order proposal fulfil the ‘basic conditions’ required of a neighbourhood plan as laid out in the representation procedure. I would like to request to be notified of the local planning authority’s decision under regulation 19 (decision on a plan proposal) in relation to the neighbourhood plan, and regulation 26 (decision on an order proposal) in relation to the neighbourhood development order.</td>

<tr>
<td>Rep 4</td>
<td>Once this Neighbourhood Plan is passed by KBC, Broughton will obtain more control over future development to ensure that our identity and heritage is not overlooked in the demand for more houses and caravan plots in the village. My thoughts and hopes are articulated so much more eloquently and succinctly in the document itself! I wish to express my gratitude to all the members of the Steering Group who have so obviously volunteered hours, days, weeks, months and indeed years to complete the huge and complicated document that now exists as our village’s Neighbourhood Plan.</td>
</tr>
<tr>
<td>Rep 5</td>
<td>Having studied Broughton’s excellent Neighbourhood Plan I believe that all the basic conditions have been met particularly 1, 2, 3, 4, 5. Items 6, 7 &amp; 8 I do not consider myself able to make a judgement on.</td>
</tr>

</table>
In support of the plan I think that Broughton has more than pulled its weight in providing space and sites for housing development over the last few years and that further development outside of that identified within the neighbourhood plan should be prevented through to 2031 to conserve the village status and layout.

**Rep 6**

I support Broughton’s Neighbourhood Plan. We the residents of Broughton are the people who encounter the consequences of the ad hoc development carried out over the years, together with the constraints of our infrastructure, or lack of it. The Neighbourhood Plan is an opportunity for us to determine future development so it becomes an asset to Broughton and not a constraint.

**Rep 7**

I would like to confirm my support for the Broughton Neighbourhood Planning Process. Broughton has been subjected to a high level of development which has not served us well on many fronts. The time has come for a structured plan to be in place with stated objectives, process and policy. This will provide for healthy and sustainable growth in the future that will be in response to our needs and will fully respect the village that we have. We want our children and future generations to enjoy living in Broughton and to be able to have the pleasure of the same qualities and character of the village. I know that this Plan is a herculean task for the volunteer steering committee who have managed the whole thing and I congratulate them on their tenacity in seeing it through. Looking forward to our referendum. Vote Broughton!

**Rep 8**

I wish to register my support for the Broughton Neighbourhood Plan without reservation. This plan has been developed following considerable hard work by our Steering Group to represent the views of those of us who feel there has already been sufficient new larger scale development in the village, and who wish to retain what remains of its character.

**Rep 9**

I would like to submit some comments on the current round of consultation on the Broughton Neighbourhood Plan.

I am a resident of Broughton for a period of some 13 years. Firstly let me say that I am not a planning expert, so I find myself unable to comment on whether ALL of the Basic conditions as set out have been
met. I restrict my comments to certain of the
statements.
Statement 2. Preserving the character and
special features of architectural and historic
interest. I do fully support the draft
Neighbourhood Plan in attempting to preserve
Broughton as a village in the “Northamptonshire
character”, rather than allow it to eventually
merge into Kettering and become a suburb. The
recent developments on the west of Kettering
are already eating too much into the separation
between Kettering and Broughton.
Statement 3. Preserving and enhancing the
character and appearance of conservation areas.
I support the draft plan in identifying the existing
Local Green Spaces and attempting to enhance
these in a sustainable way. As an example the
preservation of LGS6 (one of the allotment
areas) is to be commended.
Statement 4. Contribution to sustainable
development. I support the draft plan as a
genuine local effort to provide a sustainable
framework for the village as a living, breathing
place to live.
Lastly, I think the team developing the draft
Neighbourhood Plan have made a considerable
effort to consult the residents of the village and
they should be commended for the incredible
amount of work that has gone into the draft.

I would like to offer the following comment on
the Broughton Neighbourhood plan. I hope this
is an appropriate comment to send at this late
point, - I had neglected to keep up with the
process adequately.
Where the plan relates to housing issues, the
overall impression is that the plan seeks to
address the continuation of overdevelopment in
the village and prevent further incursion into the
surrounding countryside.
As I am directly affected by speculation
surrounding development of fields between my
own house and the bypass I am strongly in
favour of any method by which those who have
chosen to live as part of a village instead of a
housing estate can continue to do so.
Currently all my own home improvement and
property maintenance plans are on hold pending
information relating to Developers plans and I
find I am considering moving elsewhere.
I look upon this situation with complete dismay
having lived in the village almost all of my life,
except for 4 years when I could not afford a suitable home in the early 1990’s, A lack of appropriate affordable housing is not a recent issue, nor will ever change. Currently wherever a development happens, those who benefit financially are not those who suffer the effects – an imbalance which needs correcting nationally. I note there are plenty of plans for housing being submitted, but nothing that will bring enough employment to the village – another imbalance made worse with every new house built. I welcome the traffic calming measures, but would suggest the throttle scheme on Northampton Road might be simpler. From an admittedly selfish viewpoint, it does make access to my property a little more difficult at busy times from the north east (out of the village centre) where I will need to cross through those waiting at the Give way (and causing any vehicle behind to block the gap and hence the road) if I can’t communicate effectively with headlights for those at the Give way to proceed. More importantly however, those drivers who consider speed limits, and priorities around parked vehicles to be optional, will also consider the Give way as optional – as demonstrated by the throttle in the High Street. I suspect there will be drivers increasing their speed to ‘make it through the gap first’ at this throttle too, but the speeds will be much higher, whilst the residents will be plagued by the sound of car horns. With a throttle of this type, those who abide by the rules can be those most inconvenienced, and those who do not are encouraged. A speed hump at this point treats all fairly and effectively whilst being more economical, Alternatively an extended raised area across Donaldson Avenue (Kettering Leisure Village style) could help protect those exiting that junction too. Whilst none of the options will improve my own travelling experience, it is accepted that something is needed. Finally, having read the 108 pages of the plan and understood it as best I can, I sincerely commend those undertaking the task. I can imagine how much time and effort has gone into it and hope that their efforts are respected by all.

I am submitting this letter on behalf of all the residents of St. Andrews Court (15 flats) and St
Andrews Close (22 Bungalow’s ) in our sheltered housing scheme.
We have had a meeting and believe as a whole that the Plan Proposal and the Order Proposal should be accepted and move forward to the next stage in the proceedings and we believe that the proposals meet with the Basic Conditions required. We all love our village and many of our residents have live here all there lives while others like me moved into the village in the last 20 years so as you must be aware we are happy to keep our village as much unchanged as is possible while understanding certain things will have to change.

<tr>
<td>As someone who is resident in Broughton, and has been for the past 20 years, I would like to comment on the Broughton Neighbourhood Plan. I would commend the work that has gone into producing the plan, and the spirit behind putting the people in control of how the village develops. In particular I commend that this has been a community effort to accommodate the views, opinions and needs of a broad cross-section of Broughton residents. I totally approve and endorse the content of the plan.</td>
