Deletion of Historically and Visually Important Green Space. HV1027, HV1028 and HV1054

Please use a separate form for each representation.

#### Representation

As residents of Loddington for 12 + years we wish to express our concerns and objections to remove the designation of Historically and Visually Important Green space within the Village.

Our reason for moving to this beautiful village was the green spaces within that create a wonderful village feel, peaceful spaces and rural views. It would be devastating to us if changing the current designation eventually leads to these green spaces being eroded and worse still being built upon.

HV1027 and HV1054 are at the heart of the village and provide a tranquil surround to St.Leonard's Church. They are not only historically important to the village but provide very significant quiet spaces for the residents to not only reflect and enjoy the environment.

HV1028 - Removing the Historical and Import Green Space Status, opens up the opportunity for the land to be built on in the future. Whilst this area is less picturesque, it would be extremely sad to see this well kept green space become open to future building.

The character of the village would be destroyed if these spaces were lost.
