#### Which Main Modification, change to the Policies Map or section of the Sustainability Appraisal Report Addendum or Habitat Regulations Assessment Addendum does your comment relate to?

MM15 Page 42 Policy TCE2 - Desborough still does not have the infrastructure required to support more housing.

The land adjoining the River Ise needs to be protected. It is still a flood plain and underground springs pop up all the time. In the field owned by KBC, a pool of water popped up in the middle of the field earlier this year (as the horses were drinking from it). There is another underground spring at the gate of said field close to the sewerage plant that has now remained for more than 12 months.

MM27 Policy NEH3 Pages 67-69

The whole area is regarded by residents as one of natural beauty that we do not want to lose and during the pandemic, it has been used even more than usual to help people maintain general and mental health. New animals are now seen in the fields and along the river by me as I walk it every day, including Kingfishers, Kites and other birds of prey.
