I believe that it is essential to protect the village green spaces for the following reasons.

- 1 Green space has always been an essential and traditional aspect of village life and therefore the benefit of the community.
- 2 We do not have a formal village green, therefore the existing green spaces are essential for mental well being and to cater for village activities e.g. village fete.
- 3 The huge benefit of these green spaces has never been more evident than during recent covid lockdown which limited exercises and general health to the village area.
- 4 Covid lockdown has focused everyone's attention on the needs and benefits of wildlife in many forms. These green spaces are essential to maintain and expand these benefits not just for now but for generations to come.
- 5 We do not have a formal village green and we have already lost one large green area through the building on the old school playing field which was used regularly for village activities.
- 6 In my opinion a village without protected green spaces, ceases to be a village.
