I will not detail all of the amendments stated in this section but I believe can be commented upon quite simply by saying that all of the above cannot be fairly approved without consideration and completion of other local developments to understand the impact on ecology, traffic, noise and therefore cannot truly measure the harm to the character and setting.

To summarise - the proposal for reserve matters that is only published two or three days before the Inspector appointed by the Secretary of State had defined that reserve matters had to be met (inclusive of the Covid-19 extension) has to be considered somewhat dubious and certainly not planned or well thought through.

Time should be allowed for the amendments / to the Local Plan to be completed before approval is even considered to any proposed reserve matters as so many of the amendments support the prevention of the development across the Ise Valley.
